

STEADY PRESS

Physical Therapy Exercise Log

Record the programme, do the reps, prove the progress — a 12-week log for anyone who has been given exercises and needs to actually do them.

USE

Print as many copies as you need

How to use this journal

- ☐ Write your prescribed programme on the programme sheet
- ☐ Log every session, including the short ones
- ☐ Rate pain before and after each session
- ☐ Measure range of motion weekly, same time of day
- ☐ Shade the 12-week grid so gaps are visible
- ☐ Take the session notes page to each appointment

THE SCALE YOU WILL USE

0 1 2 3 4 5 6 7 8 9 10

NO PAIN WORST IMAGINABLE

1 Noticeable, easy to ignore 3 Annoying, does not stop you 5 Hard to concentrate through 7 Limits what you can do

9 Unable to function

Adherence is the variable that predicts outcome, and it is the one thing nobody measures. This log measures it.

This is a record-keeping tool, not medical advice. Bring it to a professional rather than using it to self-diagnose.

My programme

Fill this in with your therapist, not from memory afterwards.

WEEKLY

Range of motion tracker

Measure at the same time of day, warmed up the same amount. Consistency matters more than precision.

MEASUREMENTS

WEEK	MOVEMENT	LEFT	RIGHT	PAIN AT END RANGE	NOTE

MOVEMENTS TO TEST

- ☐ Turn head left / right
- ☐ Tilt ear to shoulder
- ☐ Look up / look down
- ☐ Shoulder overhead
- ☐ Arm behind back
- ☐ Trunk rotation

12-week adherence grid

TARGET SESSIONS PER WEEK

1	2	3	4	5	6	7	8	9	10	11	12	13	14
15	16	17	18	19	20	21	22	23	24	25	26	27	28

Notes

Anything the structured pages did not capture.

Before you start

These pages are a personal record-keeping tool. They are not a medical device, they do not diagnose anything, and nothing here is medical advice.

Tracking is useful because it turns vague memory into specifics you can hand to a professional: when it started, what makes it worse, what you already tried. It is not a substitute for seeing one.

See a qualified healthcare professional about any new, severe, or worsening symptom. Seek urgent care for chest pain, numbness or weakness in a limb, loss of bladder or bowel control, severe headache of sudden onset, pain following an accident, fever with neck stiffness, or any symptom that frightens you.

Personal use only. You may print unlimited copies for yourself and your household. Reselling, redistributing, or sharing the files is not permitted.
